training

# **Applied for Business**

### **Informed Training**

Consultation means training that is delivered to meet your company's unique requirements. ATS can deliver a mix of face-to-face, online, blended and practical applications to fit in with how your business works.

Assessing your specific needs, we can arrange training suitable to your operations. Through collaboration, we can also create bespoke training with our in-house writers and developers.

# **Applied for Work**

### **Industry Expertise**

Compliance assurance is important in ensuring that your employees are qualified to apply regulatory requirements and industry best practices.

Our instructors are industry professionals with current, real-world experience in Food Processing.

# **Applied for Skills**

### **Real Results**

Training incorporates Standards for Food Safety Australia and New Zealand / Food Authority NSW and industry best practices. Your training outcomes should be realistic and measurable.

We don't stop there. ATS defines what must be achieved and monitors how well these outcomes have been delivered.

# **Applied Approach**

#### **Program Features**

- Blended learning, assessment activities in the workplace, supported by relevant stakeholders
- A delivery model based on project/event management principles to keep student progression on track.
- Multiple exit and entry points to support a flexible format of delivery for student and employer.

### **Student Benefits**

- Learning milestones are clear, flexible, and highly organised to support the student experience
- Assessment deliverables are built throughout the program to support confidence and commitment levels of each candidate.
- Students, employers and relevant stakeholders are provided with an annual calendar to organise attendance and workplace support for each program activity.

# **About the Qualification**

This qualification reflects the role of individuals working as operators in a food processing environment who have responsibility for overseeing all or part of a processing plant and related equipment.

They are required to work autonomously, use judgement, interpret information, and apply solutions to routine and some non-routine problems.

They may also take some responsibility for the output of others.
